

Industrial Services

One goal, one promise: To provide not only what you want, but also what you need.

Our staff can provide rigging, millwright, process piping and machinery moving. We also install production equipment for bulk material handling industries. Our plant shutdown work involves building modifications, machine foundation creation and structural needs.

We have expertise in engineering, designing and doing structural repairs and modifications to buildings, bridges, foundations and other structures.

Zartman is a one-stop shop for all your needs. Our team can develop, design, build and install everything before handing you the keys. Whether you need a new building or an addition, we will take care of your needs. We will do whatever it takes to work around your conditions to meet your business requirements.

Millwright services

We have staff members dedicated to helping you from the moment your machinery is unloaded to the time it needs to be removed and replaced with a newer model. We work with precision and efficiency to ensure your machinery is assembled and installed accurately while minimizing production downtime.

Our millwright services can help.

- Install machinery
- Maintain and repair machinery
- Dismantle machinery

Rigging & Moving

Zartman Construction has a full fleet of cranes, from 8.5 tons to 225 tons, which can be called upon to provide rigging and installation services.

Our team has experience moving anything from 500lbs to 200 tons. Several members of our staff are dedicated to providing rigging, millwright and machinery moving quotes.

Our crane and rigging services can help.

- Equipment lifts
- Heavy machinery moves
- Assembling heavy machinery
- Machinery installation

Equipment Installation

Zartman installs bulk-materials-handling equipment for the aggregate, coal, food and feed industries.

We've installed standard and overhead conveyors, storage tanks, bins, mills, shakers, liquid silos, bucket elevators and other equipment. We can also install your overhead crane system and reinforce your building to support it.

Steel Erection

Our certified welders and erectors can fabricate and erect a steel structure to meet your needs. Whether you need a new cat walk, hand rail, mezzanine, or an access platform or stairs we can build it for you. We can also build new footers to support your equipment.

Our experts can also guide you through the process of erecting a new building or addition.

Process Piping

Whether you're looking to transport water through affordable, plastic piping or food through sterile, stainless steel piping; we can help you install process piping that meets health and safety standards.

We're familiar with the different types of piping and educated on the standards for your industry.

Welding

Zartman employs certified welders as well as certified welding inspectors (CWI). All of our welders are tested and certified per AWS D1.1 standards to perform shielded metal arc welding in horizontal, vertical and overhead positions.

We will train our employees to meet any additional job-specific process welds required for your project.

Heavy Haul Trucking

We'll pick up items from — and deliver them to — your door. We're familiar with the permits and alternate routes that may be required.

Let us help you get the equipment you need to its destination on time. Our professional drivers are experienced and here to help you.

Dock & Rail Service

To further assist with your materials' handling operation, Zartman has railroad siding, dock and rail service available to load or unload your materials. We can also temporarily store your equipment and materials in our yard.

Sometimes outpromised. Never outperformed.
